Accordingly, a reconciliation to the corresponding GAAP financial measure is not available without unreasonable effort.

Non-GAAP Financial Measures (Unaudited)

To supplement the consolidated financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”), we use the following non-GAAP measures, which present operating results on an adjusted basis: (i) Adjusted EBITDA, (ii) Adjusted EBITDA margin, (iii) Restaurant level operating profit and (iv) Restaurant level operating profit margin. Our presentation of these non-GAAP measures includes isolating the effects of some items that are either nonrecurring in nature or vary from period to period without any correlation to our ongoing core operating performance. These supplemental measures of performance are not required by or presented in accordance with GAAP. Management believes these non-GAAP measures provide investors with additional visibility into our operations, facilitate analysis and comparisons of our ongoing business operations because they exclude items that may not be indicative of our ongoing operating performance, help to identify operational trends and allow for greater transparency with respect to key metrics used by management in our financial and operational decision making. Our non-GAAP measures may not be comparable to similarly titled measures used by other companies and have important limitations as analytical tools. These non-GAAP measures should not be considered in isolation or as substitutes for analysis of our results as reported under GAAP as they may not provide a complete understanding of our performance. These non-GAAP measures should be reviewed in conjunction with our consolidated financial statements prepared in accordance with GAAP.

Adjusted EBITDA and Adjusted EBITDA Margin

Management uses Adjusted EBITDA and Adjusted EBITDA margin (i) as factors in evaluating management’s performance when determining incentive compensation, (ii) to evaluate the Company’s operating results and the effectiveness of our business strategies and (iii) internally as benchmarks to compare the Company’s performance to that of its competitors.

Restaurant level operating profit and Restaurant level operating profit margin

Restaurant level operating profit and Restaurant level operating profit margin are not indicative of our overall results, and because they exclude corporate-level expenses, do not accrue directly to the benefit of our stockholders. We will continue to incur such expenses in the future. Restaurant level operating profit and Restaurant level operating profit margin are important measures we use to evaluate the performance and profitability of each operating restaurant, individually and in the aggregate and to make decisions regarding future spending and other operational decisions. We believe that Restaurant level operating profit and Restaurant level operating profit margin provide useful information about our operating results, identify operational trends and allow for transparency with respect to key metrics used by us in our financial and operational decision-making.
